Erastudio Art-Gallery was founded in Milan in 2019 .The gallery has focused to rediscover artists in the 1960/1970 , in both the Italian and international art scene, with distinctive languages of contamination between art and architecture, still underestimated and unfamiliar to a wider audience.

Erastudio Art-Gallery born from an historical critical reflection of the concept of space perceived through art, develop the will to create environments in which the dialogue of contemporary and historical artworks plays a fundamental role. Erastudio Art Gallery collaborates directly with artists, with their heirs or the foundations that represent them.
